**Luminares 2019**

**[www.slsnw.com](http://www.slsnw.com)**

## LINDA

*Photo Embossed NO Glare Lens*

IP65 | DLC Listed | Vandal Resistant

Simple Installation | High Efficiency LED | Emergency Options

Surface or Suspended Options | Stainless Steel Vandal Resistant Single-Piece Clips

Photo Embossed Lens for Maximum Glare Reduction

UV Stabilized Ultra High-Impact Resistant Polycarbonate Lens

Clear or Grey UV Stabilized Ultra High-Impact Resistant Polycarbonate Body

## TITAN

*High Pressure Die-Cast Aluminum Body*

IP65 | Rugged Vandal Resistant

Ideal for Prisons, Detention Centers, Subways & Tunnels

Marine Grade High Pressure Die-Cast Aluminum Body

Marine Grade Stainless Steel Vandal Resistant Screws

UV Stabilized Ultra High-Impact Resistant Polycarbonate Lens

ADA Compliant

## Crafted Elegance

*Designed With 316 Stainless Steel*

*Solar Bollards & Poles*

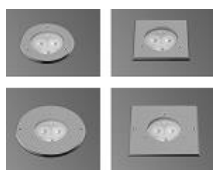

IP68 - IK10

3F Filippi, an acronym of Fluorescent Fixtures Filippi, was founded in the hills near Bologna in 1952 as an innovative company which was able to bring the technological know-how of the lighting sector of those years to the Italian market, in particular equipment dedicated to the use of linear fluorescent lamps

After its first location in Rastignano, in the 1970s 3F Filippi built its first large production facility in Via Garganelli, Pian di Macina, where it manufactures the decorative and industrial surface luminaires which, thanks to the use of highly efficient light sources, combine aesthetics and taste with low power consumption. These were the first steps which would make 3F Filippi known in the world of lighting design.

In the 1980s, the experience acquired with designers, installers and customers led to the creation of increasingly high-performing products, confirming the company as one of the major Italian and international producers in the office and industrial lighting sector.

## Linda Transparent LED (LTR)

## Linda Industrial LED (LIN)

# Linda

3F Linda range has become famous for its soft and smooth lines, its patented snug fit snap-lock clips, its compact egg-shaped housing (4 3/8" maximum in the case of ceiling installation with brackets), its internal reinforcement structure and its elastic, shatterproof polycarbonate diffuser. Thanks to its flexibility, it finds applications in residential and commercial

3F Linda is available in three different lengths nominal (2', 4' and 5') with different power and luminous flux levels, and with both housing widths (4" and 6 1/8").

Its efficient electronic wiring decreases power consumption and start-up times. Thanks to the photo-etched diffuser, 3F Linda is now even higher-performance and economical, with improved diffusion and softer light, and increased visual comfort.

3F Linda shows off the best of 3F Filippi's design philosophy in looking for the best production solutions which respect the environment and lead to a reduction in materials and energy across the whole of the product's life cycle, by:

- Reducing power consumption and increasing the efficiency of our products thanks to the introduction of intelligent electronic wiring, high-efficiency sources and optimization of the distribution of the luminous flux, thanks also to the possibility of installing flow reflectors.
- Limited use of different materials in order to facilitate the assembly, installation and recycling phases: only polycarbonate (body, diffuser, clips), aluminum or steel (flow reflectors, gear tray and stainless-steel clips) and the copper in the wires (completely removable) are used in 3F Linda. Moreover, connection between components are all reversible and use completely recyclable materials, facilitating disassembly and disposal of the product at the end of its lifetime.
- Recyclable green packaging, like all of 3F Filippi's products, in recycled cardboard.
- Reduced ecological footprint, with products manufactured with energy from PV solar panels and product handling following a "zeromile" philosophy.
- Installation compatibility with previous versions: the new 3F Linda integrates perfectly in all environments, becoming the perfect solution to update existing installations – thanks to its full compatibility with the previous fluorescent version in terms of its size and accessories.
- Reuse of these elements means that less energy is used to create new products and accessories for adaption of previous installations.
- Installation is quick and safe thanks to the fixing brackets made entirely of stainless steel (both the internal and external part); the weight is distributed optimally. The sliding quick connection bracket can also be adjusted to suit the thermal expansion of the luminaire even in environments with a notable temperature range. A set of ceiling and chain-mount fixing brackets is supplied with each luminaire.

## 3F Linda Transparent LED

4" or 6" wide polycarbonate vapor tight

**LINDA TRANSPARENT:** For use in car-parks or environments where indirect ceiling and diffused direct lighting is required to supply uniform illumination.

### MECHANICAL CHARACTERISTICS:

- **Transparent** housing in self-extinguishing injection molded UV stabilized Polycarbonate.
- **Diffuser:** Photo-embossed to diffuse LED spots
- **Gasket:** Molded one piece injected long life sealing foam gasket provides.
- **IP65:** Watertight seal.
- **Diffuser: Frosted Transparent** Self-extinguishing injection molded polycarbonate, UV stabilized, with smooth external surface and differentiated shot-blast prismatic internal surface.
- **Gear-tray reflector unit:** reduced width for a greater indirect distribution, in hot galvanized steel, painted in white polyester, fixed to the housing by means of snap-lock devices in steel. Hinged opening for simple maintenance and installation.
- **Snug fit snap-lock clips,** Single action clips in stainless steel or polycarbonate (standard), for diffuser's mounting, vandal-resistant opening.

WET LOCATION

### Technical Data

Diffuser	Clear Polycarbonate
Body	Clear Polycarbonate
Ceiling Clips	Stainless Steel
Diffuser Clips	Stainless Steel
Length (approx.)	26", 50" & 62"
Driver	120-277V 50-60Hz (0-10V dimming control)
LED Watts	12W, 24W, 30W
LED rows per fixture	1 (4" wide), 2 (6" wide)
LED Color	3000K, 4000K
CRI	> 80
Life Rating (50,000 hrs)	L85/B10
Warranty	5 years

### Installation:

**Linda** offers **quick** and **safe** installation with various types of fixings. The Luminaries are supplied with two types of mounting devices, included: Ceiling & Suspended

#### Ceiling:

Provided with Pair of metal brackets supplied for quick installation.

#### Suspended:

Hook or chain mounting. Provided with a Pair of steel springs supplied for quick install

## 3F Linda Industrial LED

4" or 6" wide polycarbonate vapor tight

**LINDA INDUSTRIAL:** As a result of its special design, with regular, streamlined shape and **patented snug fit snap-lock clips**, it is ideally suited to both home and commercial environments. The latest in technology and materials combine to allow a reduction in thickness which increases not only luminous **efficiency**, but also **elasticity**, thus ensuring improved sturdiness.

### MECHANICAL CHARACTERISTICS:

- **Body:** Grey Ral 7035 housing in self-extinguishing injection molded UV stabilized Polycarbonate.
- **Gasket:** Molded one piece injected long life sealing foam gasket provides.
- **IP66:** Watertight seal (polycarbonate clips)
- **Diffuser:** **Frosted Transparent** Self-extinguishing injection molded polycarbonate, UV stabilized, with smooth external surface and differentiated shot-blast prismatic internal surface.
- **Gear-tray reflector unit:** reduced width for a greater indirect distribution, in hot galvanized steel, painted in white polyester, fixed to the housing by means of snap-lock devices in steel. Hinged opening for simple maintenance and installation.
- **Snug fit snap-lock clips**, single action clips in stainless steel or polycarbonate (standard), for diffuser's mounting, vandal-resistant opening.

## 3F Linda (Transparent/Industrial) LED

### 15 GZI Wall Mounting Angle Brackets

Pair of brackets and hooks in stainless steel, with screws and bolts for fixing to the Linda, for wall or ceiling mounting, single- and twin-lamp luminaires.

Minimum angle of inclination = 45°

### 15 MBI Wall Mounting Perpendicular Brackets

Pair of brackets and hooks in stainless steel, with screws and bolts for fixing to the Linda, for wall mounting, single- and twin-lamp luminaires.

Extension from wall 148mm or 5 13/16th inches.

## 3F Linda Transparent LED Compact

4" or 6" wide polycarbonate vapor tight

**LINDA TRANSPARENT COMPACT:** For use in car-park stairwells, closets, small utility cupboards or environments where indirect ceiling and diffused direct lighting is required to supply uniform illumination.

### MECHANICAL CHARACTERISTICS:

- **Transparent** housing in self-extinguishing injection molded UV stabilized Polycarbonate.
- **Diffuser:** Photo-embossed to diffuse LED spots
- **Gasket:** Molded one piece injected long life sealing foam gasket provides.
- **IP65:** Watertight seal.
- **Diffuser: Frosted Transparent** Self-extinguishing injection molded polycarbonate, UV stabilized, with smooth external surface and differentiated shot-blast prismatic internal surface.
- **Gear-tray reflector unit:** in hot galvanized steel, painted in white polyester, fixed to the housing by means of snap-lock devices in steel. Hinged opening for simple maintenance and installation.
- **Snug fit snap-lock clips,** Single action clips in stainless steel (standard) or polycarbonate (optional), for diffuser's mounting, vandal-resistant opening.

# Beta

An extremely versatile lighting body, 3F Beta is the ideal lighting design solution for working environments requiring increased levels of protection.

It is equipped with LED sources with very high luminous fluxes. (131 lm/W) and is particularly suitable for environments such as warehouses, garages and production areas thanks to the wide range of operation, from -20° C to 45° C.

Available in nominal 2' 4' and 5' lengths, 3F Beta is composed of a steel or stainless steel body and offers a choice between a glass or polycarbonate diffuser to achieve the best performance for the specific installation location.

In addition to the technical performance and high strength of this product, is its ease of installation and maintenance: the new quick connection reduces installation time and makes the work of the installers much easier.

## A3F Beta LED

**BETA A3F :** As a result of its special design, rugged materials, streamlined shape and snap-lock clips, it is ideally suited harsh commercial environments. The latest in technology and materials combine to allow for a efficient and durable product. Housing of the Beta range is one piece pressed stainless steel, with either **tempered transparent clear glass (VT clear)** or **tempered molded glass (VS molded etched )** diffuser.

### Mechanical characteristics

- **Body:** Single-piece housing in pressed one piece stainless steel or pressed steel, powder coated white epoxy polyester
- **Diffuser:** **VT** transparent, **VS** molded non-combustible, tempered, mounted and locked to the single-piece perimeter frame, sealing gasket, hinged opening by means of stainless steel clips.
- **Standard Reflector:** is **Wide** flow reflector, parabolic, over-sized, in specular aluminum with superficial titanium-magnesium treatment, non-iridescent. Optional **CONC** concentrated
- **Gasket:** Molded one piece injected long life sealing foam gasket provides.
- **IP65:** Watertight seal.
- **Gland:** Entry for power supply cable at one end cap through 20mm self-extinguishing nylon cable gland.
- **Gear-tray** unit: unit in hot-galvanized steel, painted in white polyester, fixed to the housing by means of "Ribloc" rapid devices in galvanized steel, hinged opening.
- **Snap-lock clips**, in stainless steel

## Petra Opal LED

## Petra Opal LED

**PETRA OPAL:** This aesthetically pleasing surface mount luminaire can be installed on walls and ceilings, in environments that include moisture and water. This vandal resistant product is IP64 rated and has an impact rating of IK02.

Surface mounted circular lensed LED fixture UV stabilized V2 polycarbonate injection molded housing; IP64 enclosure with poured in Ecologic anti-aging sealing gasket to mitigate dust ingress; aluminum reflector painted white attaches to housing with stainless steel hardware; opal methacrylate diffusing lens provides lambertian light distribution 90% Direct — 10% Indirect lighting; lens provided with transparent polycarbonate snap-lock clips to provide tam-

WET LOCATION

### MECHANICAL CHARACTERISTICS:

- **Body** diffused housing in self-extinguishing injection molded UV stabilized translucent polycarbonate.
- **Gasket** :Molded one piece injected long life sealing foam gasket provides.
- **IP64** dust & moisture tight seal.
- **Diffuser: Transparent** Self-extinguishing injection molded translucent PMMA, UV stabilized, with smooth external surface and differentiated prismatic internal surface.
- **Gear-tray reflector unit:** reduced width for a greater indirect distribution, in hot galvanized steel, painted in white polyester, fixed to the housing by means of snap-lock devices in steel.
- **Snug fit snap-lock clips**, in *clear polycarbonate or optional stainless steel*, for diffuser's mounting, vandal-proof opening.

### APPLICATIONS:

Transit areas, stairwells. Environments where a diffused lighting provides visual comfort.

Virtually in all environments compatibly with the emissions/ atmospheres compromising the use of plastic materials. Not suitable for installation on surfaces subject to important vibrations, exposed to weather conditions.

Approvals	ETL

### Industrial application

## 3F LEM

### Die Cast Aluminum High-Temperature Hi-Bay

#### **A** **Air passage**

3F LEM has been designed to have the best possible air passage in all installation conditions, including ceiling mounted. Aerodynamic analysis has allowed dust deposits on the heat dissipaters to be avoided.

#### **D** **Heat-dissipating body**

Made in die-cast aluminum and developed in partnership with the Mechanical Engineering Department at the University of Bologna.

#### **G** **3F Lens**

Available with Wide or Concentrated controlled output (UGR < 22). Toughened glass (transparent (-VT) or molded (-VS))

#### **B** **Wiring compartment separate from heat dissipaters**

Thanks to this design, the power supplies are not affected by the heat emitted by the modules. This solution also allows wiring compartments of different lengths to be created.

#### **E** **Mid-Power LED**

Use of these LEDs offers improved efficiency (compared to High Power LEDs), less glare and optimized heat distribution (less thermal stress on the sources).

#### **H** **High Ambient Temperature**

The standard fixture is rated for 130°F ambient. For ambient temperatures upto 165°F, select the 'HT' High Temperature option.

#### **C** **Upgradability**

Lenses, sources and power supplies can be replaced at the end of their life cycle, or upgraded to next-generation sources.

#### **F** **LED photobiological safety: RG0**

The LEDs used are RG0 class (photobiological risk absent), that is they do not emit any radiation harmful to human organs.

## 3F LEM

### Die Cast Aluminum High-Temperature Hi-Bay

## 3F LEM

### Die Cast Aluminum Hi-Bay

#### WIDE

Recommended for  
industry

Rectangular ground projection

As there is no photometric overlap, the energy used and number of luminaires is optimized.

#### Uniformity

To obtain uniform lighting, the installation pitch is equal to:  
 $DT = 1.5 \times hu$   $DL = 1.4 \times hu$

#### CONCENTRATED

Recommended for  
warehouse with large  
installation heights

Elliptical ground projection

As there is no photometric overlap, the energy used and number of luminaires is optimized.

#### Uniformity

To obtain uniform lighting, the installation pitch is equal to:  
 $DL = 1.3 \times hu$

## ADVANTAGES

ADA Compliant

Vandal Proof

Corrosion Resistant high pressure die cast aluminum body

One piece injection molded clear polycarbonate diffuser

Ingress Protection – IP65

Gear tray with suspension hanger

## FIXTURE BODY

The body is manufactured from rigid high pressure die-cast marine grade aluminum (EN 1706 AC-44300).

It is specifically designed for surface mounted applications.

NOTE: The body is designed and manufactured to Prevent contraband being concealed behind the luminaire. The superior qualities of die-cast aluminum makes the body able to withstand extreme abuse. Fixture can be ordered with rear or side mounted 1/2" thread conduit entries.

## DIMENSIONS

## APPLICATION

Vandal resistance, single piece injection molded UV stabilized clear polycarbonate.

Secure to the body by six marine grade 316 stainless steel allen head socket screws.

Tamper proof screws with center pin are available upon request.

## GEAR TRAY

The removable steel gear trays is powder coated white to optimize luminaire efficiency.

All control gear components are mounted on the gear tray.

The gear tray can be removed by loosening four 316 stainless steel screws in keyhole slots, which allows the gear tray to be suspended, providing easy maintenance.

## Marine Grade - High Pressure Die-Cast Body

Designed for use in correctional facilities, prisons, detention centers, subways and wet environments.

The luminaire consists of a high-pressure die-cast marine grade aluminum body with a robust polycarbonate diffuser and is designed to operate LEDs of up to 46W.

It is specifically designed for surface mounted applications.

The body and diffuser are designed in such a way to prevent collection of dust on the accessible surface of the body. This design also prevents any grip onto the luminaire. The luminaire is designed to allow entry of surface conduits via 1/2" conduit threaded entries at both ends, as well as a 1/2" hole in the center of the back of the body. A silicone gasket ensures reliable IP 65 rating.

The one-piece, injection-molded high-impact polycarbonate diffuser is vandal resistant. It is secured to the body by six stainless steel Allen head screws. Tamper-proof screws with center-pin are available upon request.

The removable gear tray is white powder coated white to optimize luminaire efficiency. All control gear components are mounted on the gear tray. The gear tray can be removed by loosening four Allen head screws in keyhole slots, which allow the gear tray to be relieved into a suspended position, ensuring ease of maintenance.

All control gear components are removable and bear the relevant UL marks. All screws, bolts and metal parts are stainless steel.

## Technical Data

This product has been specifically designed for installa-

Body	Marine Grade LM6 High Pressure Die Cast Aluminum
Reflector	High Reflective White Powder Coated Steel
Hardware	Marine Grade 316 Stainless Steel

# Atlantis : Marine Bollard

## 6" - Marine Grade Stainless Steel 316

A range of top quality stainless steel bollards for use in all weather conditions. This beautiful bollard is manufactured in seamless Marine Grade Stainless Steel 316 and can withstand the harshest weather conditions as well as environments with a high salt content.

This product is designed to light up pathways, landscapes and open spaces and has been designed not only to resist corrosion but also with aesthetics in mind. The Atlantis is available in two different finishes; Polished, or Matte finish to suit the different aesthetic requirements of our customers.

Not only is the housing made of the highest quality stainless steel but added to the product is a High Impact Resistant UV stabilized Polycarbonate lens that in conjunction with the high temperature injection molded silicon gasket and stainless steel 316 hardware provides the ultimate in corrosion resistant bollard solutions.

Installer Friendly.

To assist with the installation the product is supplied with a laser cut steel anchor bolt template and galvanized anchor bolts for simple bolt location and concrete pouring.

# Atlantis 1 - Surface Floodlight LED

## 3.3" round - Underwater

A range of high quality Stainless Steel underwater surface mounted floodlight Luminaires with a selection of different optics .

This surface mounted Luminaire manufactured from Marine Grade Stainless 316 and is designed for use in ponds, rock pools and water features. This luminaire is not rated for natatoriums, swimming pools or water parks. The Atlantis has a Stainless Steel mounting plate and remote mounted driver.

Not only is the housing made of the highest quality stainless steel but incorporated in the product design is a unique product feature that uses a water proof potting compound that totally seals the back of the luminaire and stops water ingress.

This Luminaire is adjustable and has a tamper resistant locking feature.

Installer Friendly.

This product can be attached to walls, concrete, pavers and wood decks, etc.

Installation is done by securing the luminaire to the surface using the counter sink holes provided around the base bracket of the luminaire.

Polished Finish

## Atlantis 5 - Surface Flood LED

### 6.6" round - Underwater

A range of high quality Stainless Steel under water surface mounted floodlight Luminares with a selection of different optics.

This surface mounted Luminaire manufactured from Marine Grade Stainless 316 and is designed for use in ponds, rock pools and water features. This luminaire is not rated for natatoriums, swimming pools or water parks.

Not only is the housing made of the highest quality stainless steel but incorporated in the product design is a unique product feature that uses a water proof potting compound that totally seals the back of the luminaire and stops water ingress.

This Luminaire is adjustable and has a tamper resistant locking feature.

Installer Friendly.

This product is be attached to the surface by securing the luminaire using the counter sink holes provided around the base of the luminaire.

A 16 foot low voltage water proof power cable is provided from the back of the luminaire that leads to the remote mounted driver or remote (24Vdc or 48Vdc) low voltage transformer provided by SLS.

## Atlantis 1 - Surface Flood LED

### 3.4" round - Near Water Marine Grade Stainless Steel 316

A range of high quality Stainless Steel near water surface mounted floodlight luminaires with a selection of different optics.

This surface mounted Luminaire manufactured from Marine Grade Stainless 316 and is designed for use in areas of high corrosion as well as the possibility of seasonal flooding, near water falls, flood plains, docks, or applications in marine environments.

Not only is the housing made of the highest quality stainless steel but incorporated in the product design is a unique product feature that uses a water proof potting compound that totally seals the back of the luminaire and stops water ingress.

This Luminaire is adjustable and has a tamper resistant locking feature.

Installer Friendly.

This product is be attached to the surface by securing the luminaire using the counter sink holes provided around the base of the luminaire.

A 16 foot low voltage water proof power cable is provided from the back of the luminaire that leads to the remote mounted driver or remote 24Vdc low voltage transformer provided by SLS.

**Remote mounted box provided by contractor.**

This product is also available with a underwater rating. Contact factory or SLS website for more information.

## Atlantis 2 - Surface Flood **RGB**

### 4.0" round - Underwater Marine Grade Stainless Steel 316

A range of high quality Stainless Steel under water surface mounted floodlight Luminares with a selection of different optics.

This surface mounted Luminaire manufactured from Marine Grade Stainless 316 and is designed for use in ponds, rock pools and water features. This luminaire is not rated for natatoriums, swimming pools or water parks.

Not only is the housing made of the highest quality stainless steel but incorporated in the product design is a unique product feature that uses a water proof potting compound that totally seals the back of the luminaire and stops water ingress.

This Luminaire is adjustable and has a tamper resistant locking feature.

Installer Friendly.

This product is be attached to the surface by securing the luminaire using the counter sink holes provided around the base of the luminaire.

The fixture is pre-wired with a 16 ft water proof cable that makes connection to the remote low voltage DMX decoder/driver a simple task. Longer power cable can be provided if specified.

RGB Controls are additional options and should be specified with the control package. Remote mounted low voltage transformer and RGB control box to be provided by contractor.

**Remote mounted box provided by contractor.**

Marine Grade Stainless Steel 316

A range of high quality Stainless Steel under water surface mounted floodlight Luminaires with a selection of different optics.

This surface mounted Luminaire manufactured from Marine Grade Stainless 316 and is designed for use in areas of high corrosion as well as the possibility of seasonal flooding, near water falls, flood plains, docks, or applications in marine environments.

Not only is the housing made of the highest quality stainless steel but incorporated in the product design is a unique product feature that uses a water proof potting compound that totally seals the back of the luminaire and stops water ingress.

This Luminaire is adjustable and has a tamper resistant locking feature.

Installer Friendly.

This product is be attached to the surface by securing the luminaire using the counter sink holes provided around the base of the luminaire.

A 16 foot low voltage water proof power cable is provided from the back of the luminaire that leads to the remote mounted driver or remote mounted low voltage trans-

Marine Grade Stainless Steel 316

A range of high quality stainless underwater Luminaires

This surface mounted Luminaire manufactured from Marine Grade Stainless 316 and is designed for use near water in harsh environments such as salt water spray.

The Mira Atlantis is supplied with a Stainless Steel mounting plate and remote mounted driver.

**Remote mounted driver box to be provided by Contractor.**

Not only is the housing made of the highest quality stainless steel but incorporated in the product design is a unique product feature that uses a water proof potting compound that totally seals the back of the luminaire and stops water ingress.

Installer Friendly.

The fixture is pre wired with water proof low voltage power cable making connecting to the driver a simple task.

This product is also available in **RGB**. Please contact the factory for more details.

Driver supplied but remotely installed. Remote mounted driver box and to be provided by contractor. Optional low voltage remote 24Vdc low voltage transformer.

## Patnos 1 - Inground LED

3 ¾" round or square  
Stainless Steel 316

A range of high quality stainless inground luminaires for use in all weather conditions. This range of inground fixtures is designed to deliver the desired light effect to facades, columns, bridges monuments and trees.

The fixtures are manufactured with a combination of stainless steel 316L and powder coated low copper content aluminum. Provided with a marine grade powder coated aluminum recessing box for easy mounting in ground and concrete.

This LED fixture is available with options of a round or square trim in two different sizes (see Patnos 1 Micro). For wall wash applications consult factory.

Vandal Resistant Tempered Glass, High temperature silicone gaskets and cast resin complete the fixture and make it IP67 and IK10 to withstand harsh environments.

Not only is the body made of the highest quality low copper content aluminum but incorporated in the product design is a unique product feature that uses a water proof potting compound that totally seals the back of the luminaire and stops water ingress.

This product is designed for use on pathways, landscapes and open spaces.

The fixture is pre-wired with a 16 Ft water proof cable that makes connection to the remote mounted controls a simple task. Longer power cable can be provided if specified.

**Remote mount box to be provided by contractor**

## Patnos 2 - Inground LED 9W RGB

### 4.5" & 5.5" round or square Marine Grade Stainless Steel Frame

A range of high quality stainless inground luminaires for use in all weather conditions.

This range of inground fixtures is designed to deliver the desired light effect to facades, columns, bridges monuments and trees.

The fixtures are manufactured with a combination of stainless steel 316L and powder coated *low copper content* Die Cast Aluminum.

The fixture is provided with an aluminum recessing box for easy mounting in ground and concrete.

A specially developed potted cable entry ensures a water tight seal that stops water ingress.

This RGB fixture is available with options of a round or square trim.

For wall wash applications, the fixture can be ordered with a 7°, 15° or 25° fixed tilt. The fixed tilt option has a 5.5" in diameter or 5.5" square frame.

Tempered Glass, high temperature silicone gaskets and cast resin complete the fixture and make it IP67 and IK10 to withstand harsh environments.

The specially developed potted power cable is used to effectively bond with the cast resin to stop water ingress.

This product is designed for use on pathways, landscapes and open spaces.

The fixture is pre-wired with a 16 ft water proof cable that makes connection to the remote low voltage DMX decoder/driver a simple task. Longer power cable can be provided if specified.

RGB Controls are additional options and should be specified with the control package. Remote mounted low voltage transfer and RGB control box to be provided by contractor.

See RGB Control cut sheet for driver and control specification.

## Patnos 3 - Inground LED 18W RGB

### 5.5" & 6.3" round or square Marine Grade Stainless Steel Frame

A range of high quality stainless inground luminaires for use in all weather conditions.

This range of inground fixtures is designed to deliver the desired light effect to facades, columns, bridges monuments and trees.

The fixtures are manufactured with a combination of stainless steel 316L and powder coated *low copper content* Die Cast Aluminum.

The fixture is provided with an aluminum recessing box for easy mounting in ground and concrete.

A specially developed potted cable entry ensures a water tight seal that stops water ingress.

This RGB fixture is available with options of a round or square trim.

For wall wash applications, the fixture can be ordered with a 7°, 15° or 25° fixed tilt. The fixed tilt option has a 6.3" in diameter or 6.3" square frame.

Tempered Glass, high temperature silicone gaskets and cast resin complete the fixture and make it IP67 and IK10 to withstand harsh environments.

The specially developed potted power cable is used to effectively bond with the cast resin to stop water ingress.

This product is designed for use on pathways, landscapes and open spaces.

The fixture is pre-wired with a 16 ft water proof cable that makes connection to the remote low voltage DMX decoder/driver a simple task. Longer power cable can be provided if specified.

RGB Controls are additional options and should be specified with the control package. Remote mounted low voltage transformer and RGB control box to be provided by contractor.

See RGB Control cut sheet for driver and control specification.

## Patnos 5 - Inground LED 27W RGB

### 7" round or square Stainless Steel 316

A range of high quality stainless inground luminaires for use in all weather conditions.

This range of inground fixtures is designed to deliver the desired light effect to facades, columns, bridges monuments and trees.

The fixtures are manufactured with a combination of stainless steel 316L and powder coated *low copper content* Die Cast Aluminum.

The fixture is provided with an aluminum recessing box for easy mounting in ground and concrete.

A specially developed potted cable entry ensures a water tight seal that stops water ingress.

This RGB fixture is available with options of a round or square trim.

For wall wash applications, the fixture can be ordered with a 15° or 25° fixed tilt. The fixed tilt option has a 6" in diameter or 6" Square frame.

Tempered Glass, high temperature silicone gaskets and cast resin complete the fixture and make it IP67 and IK10 to withstand harsh environments.

The specially developed potted power cable is used to effectively bond with the cast resin to stop water ingress.

This product is designed for use on pathways, landscapes and open spaces.

The fixture is pre-wired with a 16 ft water proof cable that makes connection to the remote low voltage DMX decoder/driver a simple task. Longer power cable can be provided if specified.

RGB Controls are additional options and should be specified with the control package. Remote mounted low voltage transfer and RGB control box to be provided by contractor.

See RGB Control cut sheet for driver and control specification.

# Recessed Wall (RW)

R (SF)

**Belkis 1 LLA**

**1W, 3W LED**

IP65 : Suitable for Wet Locations  
IK08 : Impact Resistant (Vandal Resistant)

## Belkis 1 LLA - wall recessed 3.1" square marine grade aluminum

A range of high quality wall recessed luminaires for use in all weather conditions.

This range of inground fixtures is designed to deliver a low glare LED desired lighting effect to corridors, open areas, pathways, steps.

The fixtures are manufactured from marine grade diecast aluminum frame and body which is powder coated.

Vandal Resistant Tempered Glass, high temperature silicone gaskets and cast resin complete the fixture and make it IP65 and IK08 to withstand harsh environments.

Not only is the body made of the highest quality low copper content aluminum but incorporated in the product design is a unique product feature that uses a water proof potting compound that totally seals the back of the luminaire and stops water ingress.

Available in a range of colors of standard colors: Light ivory, Leaf green, Signal grey, Anthracite grey, Grey white and Jet black. Consult with factory for custom color.

The fixture is supplied with 1 foot of 16AWG pigtail. Optional 24VDC low voltage. Requires remote mount 120VAC to 24VDC transformer.

The fixture is provided with a galvanized steel recessing box for easy mounting in concrete.

**SBL2 Series**  
Solar Powered LED Bollards

# Solar Bollard Lighting

Solar Bollard Lighting based in Queensland Australia who was the main R&D company for all the groups solar lighting solutions dating back to 2003 and first developed our unique bollard design shape in late 2005 before starting production overseas in early 2006 of the 1st generation series of the solar bollard range.

All manufacturing in Australia, and make their product range "certified" Australian Made.

In 2018 the all new SBL2 Series model range is now available with an Innovation Patent and a product that will outperform all our competition in light output, light distribution, autonomy, capabilities of running at full power dusk until dawn 365 days of the year no matter what global region and finally is submersible and we use Cylindrical LiFePo4 cells to power all our lights.

Solar Bollard Lighting delivers a very high quality solar bollard for extreme conditions. Using intelligent design, latest batteries and LEDs, coupled to well testign of the product, the SLB2 are a extremely highly quality product that will last for years.

Designed for a surface ground, burial inground, wall or pole mounting, the SLB2 can be used in any application. With or without reflector, asymmetric light patterns help light your way where electrical power cannot be run. Ideal for ocean/lake water environment, the fully light head will not leak. Optional amber LEDs for turtle friendly lighting. Manufactured from the latest Lexan and UV stabilized polycarbonate this lights heads are IK10 impact resistant. Poles are marine grade extruded aluminum pole with stainless steel hardware.

Dawn to dusk operation with a 10 year plus life span, these are truly install and forget solar bollards for the next decade.

Various models dependent on latitude

The all new SBL2 SR Series overhead solar powered LED pole top bollard light is ideal for lighting locations where cyclones/hurricanes/typhoons, tsunamis, tidal surges and generalized flooding is prominent. The sealed self-contained design combined with high quality impact resistant construction, stainless steel external reflector with proven market performance makes the SBL2 SR Series the perfect asset in high risk areas where continuous lighting is required no matter what situation

Significant benefit over mains powered lights and other solar bollard competitors:

- Low cost and quick installation, no trenching, cabling or wiring required
- No costly energy bills, lamps or batteries to change
- Isolated from power outages for continuous illumination without dimming requirement
- Submersible so no need for replacement after severe weather events like flooding
- More autonomy than other competitor products running full power dusk until dawn

From vandal attack, severe high wind events, flood disasters, torrential rain, crashing waves, baseball ball size hail or just daily snow coverage, no similar product will out perform our SBL2 SR Series Solar LED Bollard pole top light design for durability and continuous performance. Electronic circuit design fully operationally tested in the field from Saudi Arabia to the sub-zero snow regions of Canada

## Overview

<b>Dome Material</b>	SABIC SLX Lexan
<b>Housing Material</b>	UV Stabilized Polycarbonate designed for lighting
<b>Internal</b>	ASA Compliant

## Solar Powered LED Bollards

### Install Location - Autonomy

Model	Model Lumens	Power Draw mA	Location Example	Location Night Hours	TOTAL Amp/s Used	DAILY DEPTH OF DISCHARGE	AUTONOMY IN DAYS	AUTONOMY IN HOURS
SBL2-040ANW	16	40	Anchorage, AK	18.73	0.75	5%	20.4	382.5
SBL2-080ANW	32	80	Edmonton, Canada	16.73	1.34	9%	11.4	191.3
SBL2-120ANW	48	120	Billings, MT	15.56	1.87	12%	8.2	127.5
SBL2-160ANW	64	160	Denver, CO	14.79	2.37	15%	6.5	95.6
SBL2-200ANW	80	200	Houston	13.86	2.77	18%	5.5	76.5

A range of Vandal resistant high quality Solar Bollards for use in all weather conditions. This easy to install bollard is manufactured in Ultra High Impact UV stabilized Polycarbonate which houses the photovoltaic and LED system. The Bollard pole is manufactured in Low copper content Extruded Aluminum which is offered in a Anodized or UV stabilized powder coat finish.

This product is designed to withstand the harshest weather conditions as well as environments where vandalism or product tampering is prevalent. The solar bollard is a stand alone unit that requires no power and is designed to light up pathways, landscapes, parks and open spaces and has been designed not only to resist corrosion and vandals but also with aesthetics in mind.

The SBL is available in several different Power Output versions depending on where the bollards will be utilized as well as a selection of pole options and decorative reflector tops, to suit designers requirements.
